

Perth Entertainment and Sporting Precinct

Project Update | May 2025

The new Perth Entertainment and Sporting Precinct at Burswood Park, adjacent to Optus Stadium, will bring sport, culture and community together in a dynamic, multi-purpose destination of state-wide importance.

We are asking for ideas from community members, nearby residents, visitors, sporting and cultural organisations, and other interested stakeholders to help shape the precinct. Scan the QR code to:

Participate and stay informed by registering for project updates.

Contribute to our online consultation platform.

These ideas will help shape preliminary concept development, which will then be available for further community and stakeholder input.

The precinct will create a vibrant, multi-purpose destination enhancing Burswood Park's existing activities, delivering new amenity and improved accessibility for visitors and nearby residents, and strengthening connections between Optus Stadium, Perth city and surrounds.

It will elevate Western Australia's standing as a premier place for sport and entertainment, featuring:

A new outdoor amphitheatre for live music and other events, with 15,000-20,000 capacity, complementing Burswood Park, Optus Stadium and Crown Perth.

A multi-use track, including for use by FIA-approved Supercars, cycling criterium and community sport.

A multi-use building, including event and function facilities and meeting spaces.

Better transport and connectivity with Optus Stadium and the wider precinct, particularly for people with a disability.

Enhancement of the local environment through landscape improvements (such as an urban forest) and renewal.

Precinct design will incorporate Burswood Park's 20 Year Vision, respond to relevant state planning policies and uphold and improve the Park's garden amenity. The precinct footprint does not extend to the Swan River.

Indicative concept direction

The precinct will be open for general community and visitor use for most of the year and benefits will include:

A multi-use precinct hosting major and local events and activities.

Enhancement of the local environment through landscape improvements.

Connecting capital city attractions and improving community amenities.

Positioning Perth on the touring map for medium-to-large scale open air cultural performances and festivals.

Improving transport, connectivity, access and walkability to and from Optus Stadium.

Economic return through increased tourism, job creation and venue experiences.

Indicative timeline

May – June 2025
Community and stakeholder consultation

June – early 2026
Precinct planning and design, project approvals and early works

Early 2026 – 2027
Precinct construction work
